Better **SENSORY** in
Better thinking out

VISUALLY, we all can tell when things get blurry, so seeing a optician or eye specialist occurs naturally

HEARING LOSS IS OFTEN QUITE DIFFERENT. It develops slowly and patients often don't realize how much information they are missing. Sometimes you may subconsciously avoid social meetings because not hearing well, makes conversation difficult and unpleasurable.

The great news is that Medicare has made hearing aids much, much more affordable.

As a cognitive expert, our founder has had TWO patients who had been declared mentally incompetent who took the witness stand after adding good quality hearing aids and the judges now allow them full independence. Hearing is crucial.

We believe that better testing and improved fitting will allow sound quality modulation (not just louder amplification) hearing aids for 75% OFF former costs.

We are determined to improve the way internet hearing tests are performed. We will send you disposable ear-pieces to test each ear independently. We will also test sound discrimination by giving you sentences with different background noises such as at a restaurant.

Stay tuned to hear more!

In-canal hearing aid recommendation

This hearing aid offers Excellent quality for **in canal hearing aids**. They do not require ear canal molding. Neuro preservation will act as the middle man distribution company and will receive a small but significant 3% Commission for all hearing aids bought from CERETONE

A hearing aid of this quality before 2022 when the Medicare and FDA groups approved over the counter hearing aids would have cost at least \$2000 according to the company.

Noise Cancellation

Featuring digital chips, Core One ensures consistent clarity and stable sound quality by automatically reducing noise. Say goodbye to unnecessary distractions and focus on conversations and important sounds.

Adaptive Feedback Cancelling

Core One's adaptive feedback cancelling technology identifies and eliminates whistling (feedback frequencies) before they reach your ear. This means you can hug loved ones or wear a hat without experiencing annoying squealing.

Wide Dynamic Range Compression (WRDC)

With WRDC, Core One ensures true-to-life sound quality by maintaining a balance between soft and loud sounds. Its advanced 16-channel digital chipset enhances voice clarity and adapts seamlessly to different environments, providing effortless conversations.

Delayed Auto Turn On

Core One features a unique 15-second automatic delay at startup, effectively reducing initial whistling for a smoother experience. Enjoy comfortable and clear sound with Core One, optimizing your communication and overall hearing experience.

Best Hearing Aids Of 2024 – Forbes Health

https://www.forbes.com/health//best-hearing-aids/?utm_source=google_search&utm_medium=cpc&utm_campaign=20933731162&accountid=3144749603&utm_content=159026936633&utm_term=kwd-1500650958&network=g&device=m&placement=&location_physical=9010491&device_model=&creative=688164207501&qad_source=1&qclid=Cj0KCQjwu8uyBhC6ARIsAKwBGpSZWhw2Aoa5HjQdazMCLZoOwpoBl23BY_rIFe-TUa1VuuTZ8bqznKgaAhiLEALw_wcB

This is the best review of hearing aids It is from Forbes Health and it discusses the types of hearing aids and the issues involved in understanding special functions as opposed to standard hearing aids over-the-counter.

the one aspect which could put us on the map of hearing aids is to devise a way of form fitting or at least adequately fitting the Dome type of hearing aid placed into the hearing canal it will be the only hearing aid we distribute and it will be 75% lower than the previous cost

All other lesser hearing aids are available at Walmart or discount stores but again they don't have fittings I am looking into safe measurements of just the outer aspect of the auditory canal
